RESPONSE TO NOTICE TO FILE CORRECTED APPLICATION PAPERS

Commissioner of
Patents and Trademarks
Washington, D. C. 20231

Sir:

In response to the Notice to File Corrected Application Papers dated August 31, 2004 requesting that Applicant submit a substitute application, Applicant hereby encloses (1) pages 1-17 of a clean version of a substitute specification and claims, (2) pages 1-17 of a marked-up version of the substitute specification and claims showing all changes relative to the immediate prior version of the specification and claims (i.e., the originally filed specification and claims), and (3) pages 2-18 of the originally filed specification and claims, in accordance with 37 C.F.R. 1.125 and MPEP 608.01(q). The substitute specification submitted herewith includes no new matter.

REMARKS

As can be seen on the enclosed originally filed specification and claims, due to the reproduction process of the application, vertical black lines appear down the middle of each page of the specification and claims. The enclosed substitute specification and claims is now provided such that the lines do not appear on each page.

In addition, upon receiving the Notice to File Corrected Application Papers, Applicant noted that the pages of the originally filed specification and claims were

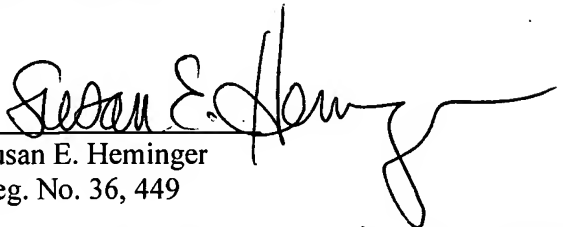

improperly numbered. Specifically, the pages of the specification and claims were numbered 2-18 instead of being properly numbered pages 1-17. The enclosed substitute specification and claims is now properly numbered 1-17.

Also noted, was that the application was missing a title. The enclosed substitute specification now includes a title. Page 1 of the marked-up version of the substitute specification and claims shows the title underlined to indicate the addition of the title to the specification per 37 CFR 1.125 (c).

Applicant submits that all informalities of the application are now corrected by the enclosed substitute specification and claims. The application is now in condition for examination on its merits and such action is earnestly requested.

Respectfully submitted,

Ron P. Maurer
